

Effective, Secure and Reliable Anti-Spam Solutions from Katharion

Katharion provides proven, highly effective, and highly reliable anti-spam and anti-virus solutions to help organizations combat the increasing burden of junk email. Featuring tremendous scalability, rapid deployment and seamless integration with virtually any existing messaging infrastructure, Katharion is also extremely simple to use – freeing time for both administrators and email users.

Effectiveness

In a fraction of a second, Katharion scans incoming messages using numerous technologies to detect spam – a powerful artificial intelligence Bayesian engine; sophisticated optical character recognition software; an extensive heuristic rule set; frequently-updated databases of known spam signatures and virus definitions; continually evolving lists of URLs, network addresses, mail servers, and other identifying elements known to be used in phishing attacks and in unsolicited bulk email; and customizable domain-specific and user-specific whitelists and blacklists.

The result is a dramatic reduction in junk email -- typically upwards of 98% -- relieving a significant burden for email users and system administrators.

Ease of Use

With Katharion's managed services, customers do not have to install or manage any hardware or software – saving time and hassle for network administrators. End users benefit from a system that requires little or no maintenance and that offers innovative features including “one-click whitelisting” and optional daily message digests.

Seamless Integration

Katharion's innovative, perimeter-based approach to curtailing viruses and spam means that it can work seamlessly with any email systems in use, offering end users a single sign-on and offering the enterprise the opportunity to reinforce existing branding.

“ We conducted extensive testing of leading anti-spam solutions. Katharion delivered the most accurate filtering results and was extremely simple to implement. ”

-- Network & Systems Architect, Sprint Canada

SOFTWARE-BASED SOLUTIONS

APPLIANCE-BASED SOLUTIONS

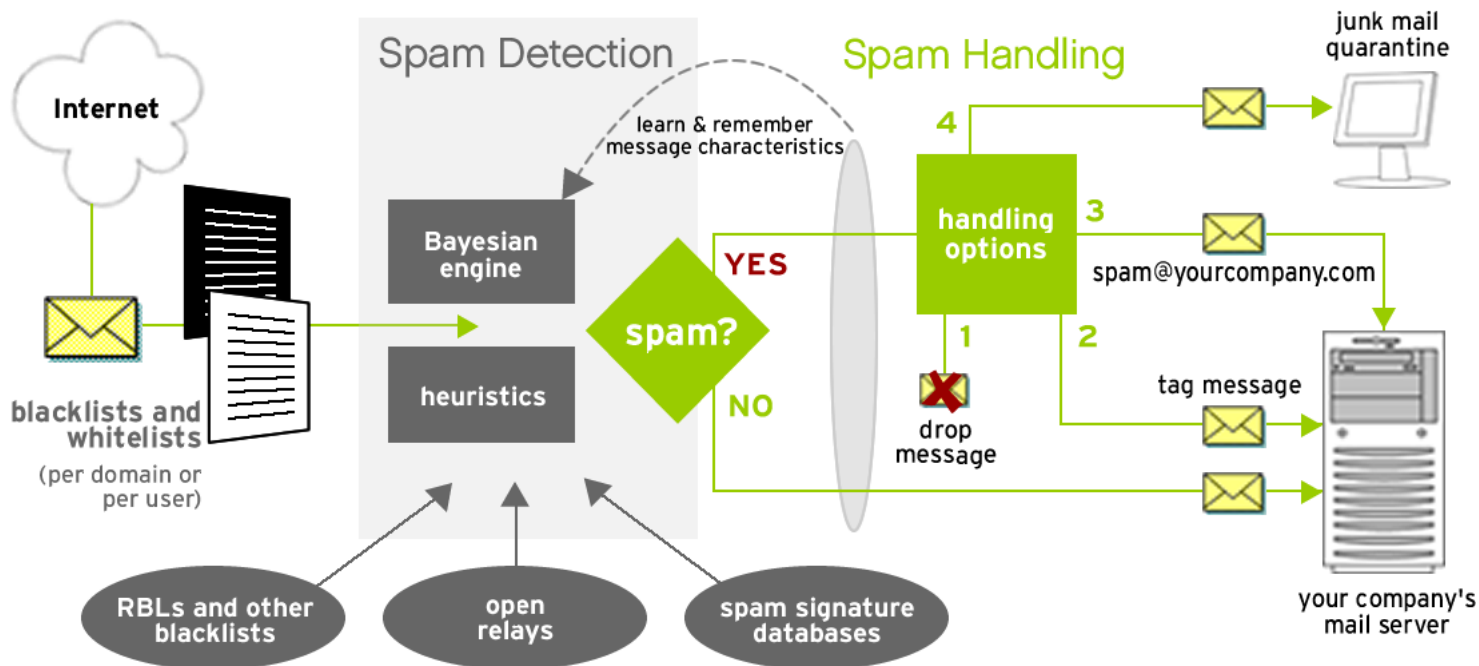

Katharion
PERIMETER-BASED,
OUTSOURCED SOLUTION

BENEFIT

can provide both anti-spam and anti-virus capabilities	✓	✓	✓

Katharion Anti-Spam: How It Works

Flexibility

Katharion provides substantial flexibility for handling of detected spam messages, including the ability to block spam and viruses before they enter the organization's network. Katharion easily handles an organization's multiple domains, alias email addresses, and desired policies for spam handling – all via a web-based management mechanism that is simple, straightforward, and efficient.

Katharion's high level of flexibility allows companies to minimize or eliminate the need for intervention by end-users and system administrators.

Infrastructure

Katharion is highly reliable, stable, and scalable to meet the needs of the most demanding customers. Featuring fully redundant, premiere data centers in Los Angeles and in Boston, Katharion's systems benefit from multi-homed Gigabit Ethernet connectivity to multiple backbone providers; redundant power served by multiple power grids, combined with emergency diesel generators; multiple continuously online Emerson UPS systems; redundant Liebert HVAC units; and a fully redundant software architecture.

Katharion's extremely reliable and secure infrastructure delivers, every time.

Virus Defense

In addition to its anti-spam capabilities, Katharion can protect customers against email-borne viruses. All inbound email and attachments are scanned by Katharion, so viruses can be detected and eliminated before they reach their destination. For companies with an existing anti-virus solution, Katharion adds another layer of anti-virus defense for the organization.
